

Laica Water Filter Cartridge

Price: €5.00

Short Description

FOM

The bi-flux[®] LAICA cartridge filters tap drinking water, improving its taste and reducing certain unwanted substances that may be present. All LAICA cartridges are made in Italy and consist of silver-plated active carbon and ion exchange resins. Active carbons are effective in reducing chlorine and derivatives. Ion exchange resins are effective in reducing heavy metals if present in tap water.

The bi-flux[®] cartridge has a duration of one month equal to 150L of filtered water.
