

# Beper Accupressure Mat

Price: €35.00

## Short Description

C301ACC001

The acupressure mat and pillow employ tiny plastic points to activate the body's pressure points, resembling acupuncture but lacking the requirement for needles. By stimulating these points, muscle tension is relieved, and blood circulation to the area is enhanced. This process facilitates overall relaxation and promotes a sense of well-being. It is particularly beneficial for alleviating back and neck pain, enhancing the quality of sleep, and diminishing feelings of anxiety and stress.
