

Type	automatically
Washing machine category	Independent
Charging mode	front
Energy class (AG)	B
Centrifugation performance	B
Screen	Yes
Drying function	Not
Delayed start/Delayed end	Yes
<b>washing</b>	
Detergency	8 kg
spin	Yes
Max. speed of centrifugation	1200 rpm
Washing cotton	Yes
Washing woolen clothes	Yes
<b>Noise level</b>	
Centrifugal noise level	76 dB(A)
<b>size</b>	
Width	60 cm
Height	85 cm
Depth	59.5 cm

Toshiba has designed a new line of washing machines able to satisfy all washing needs: cleaning, saving time and energy. With a classic design and practical functions, Toshiba washing machines offer optimal washing solutions. **Real INVERTER motor** Durability, efficiency and silence: the durable and efficient inverter motor works with 11.4% less noise than a conventional motor. The inverter motor does not present the danger of malfunctions, because the mechanical transmission inside is done through an electromagnetic field, thus eliminating mechanical wear and guaranteeing reliability. **Digital LED control panel**

The Toshiba washing machine is equipped with an easy-to-use control panel, with a display that clearly shows the selected program, the time remaining until the completion of the washing cycle and additional options. **THE GREATWAVES** The new washing technology THE GREATWAVES is inspired by the great Japanese artist Hokusai, the author of the work "The Great Wave off

Kanagowa. THE GREATWAVES technology is developed on two pillars: Flash Wave and Cold Wash, which protect clothes during washing and guarantee considerable savings in energy, detergent and time. **15' Quick wash** Save time, energy and money with the quick 15-minute program, for small amounts of laundry that do not require intensive cleaning of heavy stains, but a simple refresh. **Drum cleaning**
